Professional Summary:

Experienced Software Engineer with over 5 years of expertise in Vue.js, React.js and state management frameworks like Vuex/ Redux. Proficient in web technologies such as HTML5, CSS3, TypeScript, and JavaScript, with a strong track record in building large-scale web applications. Adept at working across cross-browser platforms, addressing design constraints on the web, and creating responsive user interfaces. Additionally, possesses 2 years of experience in backend development with Node.js, Golang and PostgreSQL, with a proven ability to build both GraphQL and REST endpoints. Skilled in end-to-end testing using Playwright and Cypress.

Skills:

- Front-End: Vue.js, Vuex, Nuxt.js, React.js, Redux, Next.js, HTML5, CSS3, JavaScript, TypeScript
- Back-End: Node.js, GoLang, Echo, gqlgen, GraphQL, REST
- Database: PostgreSQL
- Testing: Cypress, Playwright
- Other: Prompt Engineering, GPT integration, Generative AI, MJML, Chrome Extension Development, API Integration, End-to-End/Unit Testing using Cypress/Playwright, git, RESTful APIs.
- Languages: English, Malayalam

Professional Experience:

Impact Analytics, Global Technology Park, Bengaluru, India
Senior Software Engineer
November 2024 - Present

- Led the UI migration for the product, making the interface more modern and user-friendly.
- Managed a team to deliver important features on tight deadlines, ensuring smooth releases.
- Fixed bugs and performance issues to improve the application's stability and

user experience.
- Worked closely with backend developers, designers, and product managers to build and improve features.
- Improved and cleaned up existing code to make it easier to maintain and scale.
- Reviewed team members' code and helped them improve their skills through guidance and feedback.

Olvy Technologies Private Limited, Bengaluru, India
Software Engineer
April 2022 - October 2024

- Developed user-friendly interfaces using Vue.js and powerful GraphQL APIs with GoLang, enhancing user experience and system efficiency.
- Created a Chrome extension for direct user feedback collection, analysis, and voicing, significantly improving user engagement.
- Integrated popular apps like Zendesk, Linear, Jira, Hubspot, automating workflows and reducing manual efforts.
- Tackled video analytics by generating insights from user calls, improving data-driven decision-making.
- Maintained software stability and quality by writing comprehensive end-to-end tests.
- Leveraged GPT-4 to generate changelogs, detect helpful feedback, and perform analysis, enhancing product usability.
- Implemented automatic feedback detection and import from platforms like Zendesk, improving user experience.
- Designed and implemented responsive emails using MJML.
- Developed a dynamic notification system and seamless webhook integrations using GraphQL APIs and subscriptions, facilitating real-time data exchange.

Bleach International Cleaning & Cont. For Building And Cities LLC, Kuwait City, Kuwait
